

Assembly Instructions

Ovali Range

Tools Required (not supplied)

Cross Headed Screwdriver
Slotted Screwdriver
6mm Diameter Drill Bit
Tape Measure
Pencil
Spirit level

Before You Start

The screws and wall plugs supplied are only suitable for use in solid walls. If fitting to other types of wall ensure suitable fittings are used.

Ensure there are no hidden service pipes and cables where you intended to drill.

If drilling into ceramic tiles, use a special bit for ceramic tiles.

Where possible, drill your holes between ceramic tiles in the grout.

Assembly

- Measure and mark the desired location, ensure the mounting bracket is aligned correctly. Use the mounting bracket as a template to mark the drill holes on the wall.
- Drill two holes into the wall at the marked location.
- Push in 2 wall plugs ensuring correct plugs for wall type are used.
- Attach mounting bracket tightly to the wall by inserting 2 screws using a cross headed screwdriver. If necessary, repeat step A-D to locate the second mounting bracket. Ensure the mounting brackets are aligned horizontally by checking with a spirit level before drilling off the second fitting.
- Attach fixture onto mounting bracket.
- Tighten the grub screw using a small slotted screwdriver until the fixture is secure.
