

TAHARI

The Future of Denim Waste not; water not Innovation

TAHARI

Mission Zero Technology

Sustainable
product

PCW Yarns

Low water
Washes

Tahari denim crafted from sustainable fibers and low water washes.

MISSION ZERO completely replaces traditional denim distressing processes such as bleaching, acid washing, and potassium permanganate, allowing us to drastically minimize the amount of chemicals used and decrease our overall environmental impact. Instead of spraying the garment with potentially harmful additives to replicate wear patterns and wash effects, MISSION ZERO garments are hand-stitched, hand-brushed, and hand-grinded prior to washing to produce distressed aesthetic without the use of harmful chemicals.
